Fig:

8. Alopecurus (Foxtail) a a the valves of the empalement. b the single valve of the blossom with the awn c proceeding from its base d d the tips.

9 Phleum (Timothy grass) a a the husks of the empale=ment opened and magnified to shew the blossoms. b the floret in its natural state to shew the two points at the top of it. c c c the tips.

10 Phalaris (Canary) a a the keeled husks of the empalement. b b the husks of the blossom. c c the tips.

11 Milium (Millet) a a the husks of the empalement. b b the tips. c c pencil shaped summits.

12 Agrostis (Bent) a a the two pointed valves of the em=palement. b b the two valves of the blossom. c c c the tips.

13 Dactylis (Cocksfoot) a the outer and larger valve of the empalement. b the shorter valve. c the keel shaped valve of the blossom. e e e the tips. d the panicle pointing one way.

14 Stipa (Feather grass) a a the valves of the empale=ment. b the outer valve of the blossom, with the awn jointed at the base and twisted. c the inner valve of the blossom. d d the fea=thered awn. e e the hairy shafts and sum=

Fig:

25 Hordeum (Barley) a a a a a a the six valves of the empalement, two of which belong to each of the blossoms b b b. e e e the long awns of the outer valves of the blossoms. e e the naked spike-stalk as it appears after the florets are pulled off.

26 Elymus (Lymegrass) a a a a a a the valves of the empalement, two of which belong to each little spike b b b: e the empalement as it appears af=ter the little spikes are taken away.

27 Lolium (Darnel) a a a the empalements of one valve. b b b the little spikes consisting of several florets. c one of the florets opened to shew the two valves of the blossom.

28 Cynosurus (Dogstail) A the spike pointing all one way, composed of the florets B, in which a re=presents the fence with many clefts; b b the val=ves of the empalement containing several florets, and c c the florets.

29 Carex (Segg) a the tiled cat-kin. c the scaly empalement of the fertile floret. d the honey=-cup cloven at the top. b the seed bud, & g the shafts taken out of the honeycups: h h h the sum=mits. e the scaly empalement of the barren floret, with the three chives f f f.

30 Holcus (Soft grass) a a the barren florets on short fruit stalks. b the fertile floret, furnished with chives and pointals.

31 Rottbollia (Hardgrass) a a a a a joints of the spike-stalk. b o b c b c b c valves of the empalement placed outwards, the edges of one lapping over that of the other.

Fig:

8. Alopecurus (Foxtail) a a the valves of the empalement. b the single valve of the blosom, with the awn c proceeding from its base ddd the tips.

9 Phleum (Timothy grass) aa the husks of the empale=ment opened and magnified to shew the blosoms, b the floret in its natural state to shew the two points at the top of it. ccc the tips.

10 Phalaris (Canary) a a the keeled husks of the empalement. bb the husks of the blosom. cc the tips.

11 Milium (Millet) a a the husks of the empalement, bb the tips. cc pencil shaped summits.

12 Agrostis (Bent) a a the two pointed valves of the em=palement. bb the two valves of the blosom. ccc the tips.

13 Dactylis (Cocksfoot) a the outer and larger valve of the empalement. b the shorter valve. c the keel shaped valve of the blosom. eee the tips. d the panicle pointing one way.

14 Stipa (Feather grass) a a the valves of the empale=ment. b the outer valve of the blosom, with the awn jointed at the base and twisted. c the inner valve of the blosom. dd the fea=thered awn. ee the hairy shafts and sum=mits. fff the tips.

15 Aira (Hairgrass) a a the empalement. bb the blosoms, without the rudiment of a third betwixt them.

16 Melica (Melic) a a the empalement. bb the

Fig the fertile blosoms with c the rudiment of a third blosom betwixt them.

17 Briza (Quakegrass) a a the valves of the em=palement, bbbbb the blosoms, of which the outer valves only are visible. B one of the blosoms ta=ken out of the little spike: cc the outer heart=shaped valve of the blosom. dd the inner valve in=versely egg-shaped.

18 Poa (Meadow-grass) A an entire little spike. a a the two husks of the empalement, bbbbb the blosoms. B one of the florets seperated from the little spike. c the outer valve, d the inner valve of the blosom. eee the forked tips. fff the woolly summits.

19 Festuca (Fescue) a a the valves of the empalement. bbbbbb the blosoms of the little spike terminating in sharp points. c the inner valve of one of the blosoms.

20 Bromus (Broome grass) a a the empalement, bbb the blosoms, the outward valves only of which are visible with the awns growing from beneath the point.

21 Avena (Oat) a a the valves of the empalement. bbb the florets, the outer valves of which are furnished with a twisted jointed awn growing from the back. ddd the inner valves. cccccc the tips.

22 Arundo (Reed) a a the valves of the empalement. bbb the woolly blosoms.

23 Secale (Rye) a a the valves of the empalement. bbbb the blosoms; the inner valve of which is flat, but the outer concave and furnished with an awn. cc the spike-stalk with its little teeth.

24 Triticum (Wheat) a a the blunt valves of the empalement, embracing the three blosoms bbb, the outer valve only of which is seen, furnished with an awn. cc the spike stalk.

Explanation of the figures of the Grasses.

Fig:
1. Anthoxanthum (Vernal grass) a a husks of the empalement. b the awn of the inner valve of the blossom, twisted & jointed. c the straight awn of the outer valve of the blossom. d d the two tips. e e the two shafts.

2. Schœnus (Rush grass) The six petals, the three chives, & tips; the seed-bud, the shaft, and the summit cloven into three parts.

3. Cyperus (Galingale) a, the tiled spike pointing from two opposite lines, b the scale of the empalement; ccc, the tips. d the shaft, eee the summits.

4 Scirpus (Club grass). b the tiled spike, a the scale of the empalement. ccc the chives & tips. d the seed-bud, a little woolly.

5 Eriophorum (Cotton grass) a the woolly tiled spike. b the scale of the empalement including the hairy seed-bud, the chives, & the pointal.

6 Nardus (Matgrass) A. the spike pointing one way. ccc the blossoms. B one of the flowers a little magnified. a the lower & larger valve which embraces the smaller valve b. which is here drawn out of its natural situation, ccc the tips.

7 Panicum (Panic) bb, the two equal valves of the empalement. a the third smaller and outer valve, cc the valves of the blossoms. ddd the tips. ee the downy summits of the shafts.

[illegible]en out of the little spike: cc the outer heart-shaped valve of the blossom. dd the inner valve inversely egg-shaped.

18 Poa (Meadow-grass) A an entire little spike. aa the two husks of the empalement, bbbbb the blossoms. B one of the florets seperated from the little spike. c the outer valve, d the inner valve of the blossom. eee the forked tips. ff the woolly summits.

19 Festuca (Fescue) a a the valves of the empalement. bbbbbb the blossoms of the little spike terminating in sharp points. c the inner valve of one of the blossoms.

20 Bromus (Broome grass) a a the empalement, bbb the blossoms, the outward valves only of which are visible with the awns growing from beneath the point.

21 Avena (Oat) a a the valves of the empalement. bbb the florets, the outer valves of which are furnished with a twisted jointed awn growing from the back. ddd the inner valves. cccccc the tips.

22 Arundo (Reed) a a the valves of the empalement. bbb the woolly blossoms.

23 Secale (Rye) a a the valves of the empalement bbbb the blossoms; the inner valve of which is flat, but the outer concave and furnished with an awn. cc the spike-stalk with its little teeth.

24 Triticum (Wheat) a a the blunt valves of the empalement, embracing the three blossoms bbb, the outer valve only of which is seen, furnished with an awn. cc the spike stalk.
